RECIPE FOR SHOW CAKE (Class 66)

Lemon Drizzle Cake

Ingredients:

5 oz self-raising flour
4 oz soft margarine
4 oz castor sugar
2 eggs
1 tablespoon lemon curd
Finely grated rind of one lemon
1 tablespoon water

For topping: 5 oz sugar and juice of 1 lemon

Method

- Put all the ingredients (not including the topping) in a bowl and mix well together.
- Place mixture in a lined 2lb loaf tin.
- Bake in a preheated oven at 180 deg C/350 deg F, gas mark 4 (adjust as necessary for fan oven) for 40-45 min.
- During cooking make topping by mixing juice of lemon and 5 oz sugar.
- When cake is cooked and still hot, leave in tin and pierce top all over with a skewer.
- Pour the topping over slowly and leave in the tin to cool.

SHOWING TIPS

VEGETABLES

General- Do not assume that the biggest is the best. Condition, uniformity, and shape are equally important considerations. A nice set of matched veg. of good size for the type has as much chance against a larger set that may be in poorer condition. Aids may be used to enhance exhibits to improve the overall effect for the public, but the judge will only compare veg. with veg. All produce should be as clean and as free from pest damage or disease as possible.

Root crops - should be free of all dirt by carefully washing around (not up and down) with a soft sponge and plenty of running water. Try and leave as much of the root intact as possible. Trim the foliage of carrots and parsnips to 3 ins. Beetroot can be shown with foliage but remove any yellowing leaves. Carrots should be free of side roots and greenness around the shoulder.

Onions - (trimmed) should be nicely ripened. This means harvesting at least 4 weeks before the Show. They should be evenly shaped about the centre line and not lop-sided. Thin necks should be neatly tied with raffia or string and displayed on dishes of dry sand or vermiculite.

Tomatoes- should be firm, round well-ripened fruits, but not over-ripe. Green calyces should be retained to ½ inch. or so past the knuckle. Display on plain paper plates. Parsley garnishing is optional but not essential.

Beans - should be tender, straight pods of even length and a good green colour with no signs of the bean showing. Exhibit with ¼ ins. or so of the stalk intact.

Shallots -should be well-ripened with thin necks. Evenly matched round bulbs displayed neatly on dishes of dry sand with the necks tied neatly with raffia or string.

Potatoes - Select equally matched, medium sized tubers with shallow eyes. They should be well cleaned with no skin blemishes. Note that varieties that are predominantly white but have coloured speckles are classed as 'coloured' and that cream coloured potatoes or those with slightly yellow skins are classed as 'white'.

Trug of vegetables -This class is judged on variety, quality and presentation. Therefore, it is important to try and include as many varieties as you can.

One flower, one fruit, one vegetable - Remember that tomatoes, peppers and cucumbers are classed as vegetables and not fruit.

FRUIT

General- All fruits should be picked as near to the Show time as possible and displayed with stalks. They should be ripe, but not over-ripe. Do not polish, instead leave the natural bloom on the fruit. Select evenly matched specimens in good condition and display on plain paper plates.

Apples- Select large unblemished fruits of shape and colour typical of the cultivar with eyes and stalk intact. Stage with the eyes uppermost.

Grapes- should be large, symmetrical, complete bunches, properly thinned. Cut with a lateral shoot on either side of the stalk to form a 'T' handle.

Blackberries and raspberries- Select large ripe fruit of good colour with stalks. Stalks and calyces should look fresh and stage around a paper plate all facing the same way.

FLOWERS

General- Select flowers in good condition at their optimum stage of perfection, free from blemish or pest damage, with strong stems and healthy foliage.

'A vase of cut flowers' should be exactly that. If you include extra foliage (other than the foliage on the actual flower stalks) you could be disqualified.

Roses- Select blooms with well-formed centres, free from blemish with strong stems and healthy leaves. Only choose blooms that $\frac{1}{2}$ to $\frac{3}{4}$ open, or else they may open up completely by judging time and be down pointed. Damaged outer petals may be carefully removed.

Dahlias - should be fully open according to the type but showing no signs of an open (daisy eyed) centre (apart from collerette types which are naturally like this). Display evenly matched, firm and blemish-free blooms, all florets intact with about 15 ins. of solid, straight stalk. Blooms should be held at an angle of not less than 45 deg. to the main stem and should be staged in vases with oasis or paper so that they do not touch each other, and all facing the same way. Be sure to nip out any immature flower buds in the leaf joints as these count as a bloom and could lead to disqualification. Make sure that you fill the vase with water. Also make sure that size of the bloom is in accordance with the schedule, as the judge will measure the blooms if in doubt. Incorrectly sized blooms are likely to be disqualified.

Gladioli-should be nice, straight spikes ideally showing at least 1/3 fully open florets, 1/3 buds showing colour and 1/3 unopened buds. Lower buds that have faded should be cut off completely. Nip out any immature side shoots showing buds. Stage in vase in a fan shape

PRESERVES AND COOKERY

General- Jars and bottles should be clean and free from trade names. Cakes should be presented on a plate with a doyley.

Jams- The first thing the judge looks for is the seal. To obtain a good seal the preserve must not drop below 82 deg. C (180 deg. F) before being covered with either a twist top, a pliable press-on cover or a wax disc with a cellophane top when cooled. Jars should be filled to the top to allow for shrinkage. The fruit should be evenly distributed and there should be no scum, mould or sugar crystals.

Jellies- Jelly should be brilliantly clear with no pulp, haze or scum and seal as for jams.
Victoria sandwich Use a traditional recipe. There should be no cooling rack marks on the top surface. Use a jam filling and a light sprinkling of caster sugar on the top.

Biscuits- They should be rolled, cut, uniform in size, baked until crisp and snap when broken. All the biscuits should be identical.

Remember to read the schedule carefully and make sure that you have the correct number of items for the classes you are entering.
